KEEPING YOUR CUSTOMERS MOVING

37° 60' 00" N
14° 01' 15.4" E

When your customer's vehicles are out working hard, it is good to know they have the support they need to keep going no matter where they are.

Maximise productivity: Capturing tyre data manually is time consuming and it is prone to human error. As a service provider you need the best tools to perform a professional service in the most efficient way.

Optimise your expenditure: Optimising your assets helps you reduce administrative tasks and costs, allowing you to plan your work more efficiently and optimise your stock management.

Complete visibility: A lack of visibility can make it difficult to follow up on your customers needs. Understand previous jobs performed, record the performed job, capture details and ensure no information is lost.

Ensure consistent service: Help your customers maintain a consistent and efficient service across their fleet by offering full transparency on the tyre management service provided.

Customer retention: Provide the best service to your fleet customers by offering full transparency and exact data wherever they are.

Data collection: The support of fast and automated data collection is critical to optimise your service and keep your customers ahead of the game.

But tyre management inspections are a significant daily challenge for service providers.

Correct tyre and vehicle inspections take qualified personnel, administrative support and thorough planning.

The answer is Goodyear eJob.

eJob takes fleet inspections to the next level by providing full automation from tyre registration, recording of remaining tread depth and tyre pressure, as well as planning the next steps in the tyre maintenance and management process.

WHAT IS EJOB?

Goodyear eJob is a mobile tyre management application that automates and streamlines the total truck and bus fleet inspection process, from registration to maintenance, roadside assistance, retreading and warranty for service providers.

Within seconds of synchronisation, your customers can see the service performed, the reason and the list of jobs performed no matter where they are. Full transparency, including photos will help you meet your customer needs.

eJob offers full transparency of all maintenance and fleet inspections carried out, visible within seconds of job submission, anywhere in Europe.

eJob enables easier communication and greater transparency between service partner and fleets.

SUPPORTED BY FLEETONLINESOLUTIONS

The smart application is supporting Goodyear FleetOnlineSolutions (FOS), one of the leading fleet tyre management systems. This advanced platform provides fleets and tyre dealers a full overview including all vehicles, their location, applied tyre policy and agreed terms, as well as warranty.

Find out more at www.goodyear.eu/truck.

*OS 7 and above. **Available for Android mobile in 2022.

EJOB APPLICATION

- Can be installed on Android tablet* and mobile**.
- Enables tyre technicians to record and transmit tyre data and pictures to end-customers.
- Available throughout Europe.

TRANSPARENCY

- Data is regularly transmitted via Goodyear FleetOnlineSolutions.
- Fleet customers immediately see the condition of the tyres and jobs performed by its service partner.

EASY TO USE

- With a RFID or barcode scanner, the technician can record all key tyre data – tyre brand, product code, size, type, original tread depth and agreed maintenance policy by the customers.
- Other features include management of stored customer tyres as well as completed and synchronised jobs.
